

Shangfen Laboratory Spectrometer

Overview

L5S UV/VIS Spectrophotometer adopts professional proportional monitoring dual beam optical path system, low noise circuit design, and has good reliability and stability. It can meet the needs of applications ranging from daily analysis to scientific research. SHANGFEN spectrophotometer is an instrument for the measurement of light absorption or transmittance of a specific wavelength in a substance solution. It is suitable for. welcome to taobao purchase shanghai jingke shangfen I5s/I7/I8 proportional double-beam visible spectrometer, taobao hundreds of millions of hot sale, taobao hundreds of millions of hot selling goods, official logistics can be sent to the world, support foreign currency payment methods. What is the factory price range for a spectrometer in bulk orders?

The Lab Spectrophotometer is a key item within our extensive Spectrometer selection. Many distributors will. Holographic blazing grating monochromators provide high Wavelength Accuracy and low stray light, and backlit LCD displays ensure clear readings and avoid errors.
