

# Slow router connection to fiber optic cable

## Overview

Make sure your router can handle your fiber internet for the best speed. Device compatibility is key for fast internet. Poor device performance and bugs can also. When it happens over a fiber optic connection, which is often considered the best type of home internet service, it can be especially infuriating. With upload and download speeds that often exceed 1,000 Megabits per second (Mbps), fiber optic internet has the capacity to provide a seamless online. Is your router plugged directly into the ONT?

Or is there a ISP provided “modem”/router in between your router and the ONT?

Are you DHCP, Static IP, PPPoE?

Can you direct connect 1 computer to the ONT for a while and see if it continues?

Or use the ISP supplied router for a bit?

Ether can eliminate. These range from WiFi signal issues to the limits of your device. WiFi signals can get weak because of many things. Walls, metal, and electronics can block the signal. Your modem and. Ever wondered why your blazing-fast fiber optic internet suddenly slows to a crawl, or why your network connection drops out just when you need it most?

You're not alone. Fiber optic cables are the backbone of modern industry and communication, but even the most advanced networks can run into.
