

South African Telecom s primary backbone fiber optic network

Overview

In brief: South Africa's largest fibre networks in 2025/2026 are Vumatel/Maziv (2.04 million homes passed), Openserve (1.47 million in 2024 — up 65% year-on-year. 45M), Herotel (rural), Metrofibre, Frogfoot. 47M subscriptions, 65% YoY growth, and what open access means for resellers. WIOCC's regional network comprises the national transmission backbones of its shareholders in ten African countries, and networks leased from partner operators in other countries. In a strategic partnership with Huawei, Broadband Infracore (BBI) has activated a powerful new national backbone. "No Internet, no modern life." This is the South Africa's telecommunications sector experienced growth in 2024, driven by a surge in fibre subscriptions, heightened engagement on social media platforms and significant advancements in network coverage.

List of terrestrial fibre optic cable projects in Africa

This is a list of terrestrial fibre optic cable projects in Africa. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country that has submarine cable access. In most of the world, a large number of such cables exist, often amounting to robust Internet backbones
