

Southeast Asia Fiber Optic Cable Repair Fusion Splicer

Overview

The best splicers offer core alignment, fast splice times, durable designs, and smart features like cloud syncing and automated calibration. Fiber optic fusion splicer (Fujikura FSM 50S, FSM 60S, Sumitomo type 39) mainly is used in fiber optic installation and maintenance, as its name suggest, the fiber fusion splicer is used to join the optical fibers by fusing them together. Fusion splicers in current market the brands mainly are. Each household is connected to broadband (B4RN) Each household is connected to broadband (B4RN) Stable performance ensured even in hot and dusty environments Stable performance ensured even in hot and dusty environments Superb performance even in extremely cold locations where durability is a key. The main application of fiber optic fusion splicer is to melt two bare optical fiber together. Our product is an essential tool for creating a continuous and low-loss connection between two fiber optic cables.
