

Standard for the height of optical cables crossing roads

Overview

The minimum required height clearances for electrical lines over roadways subject to truck traffic are below: 5 feet for communication wires (cable TV, phone, fiber optic cables, etc). The clearances are the sum of three separate components. FO-VC2 JOINT USE - VERICAL MIDSPAN CLEARANCES 48. 110 in remote areas with lack of usual infrastructure for installation including the procedures of cable-route planning, cable selection, cable-installation scheme selection. — (1) Subject to paragraph (3), the height above ground of any overhead line, at the maximum likely temperature of that line, shall not be less than that specified by paragraph (2). (2) In relation to an overhead line used, or intended to be used, at a voltage specified in column 1 of Schedule 2. The latest published edition of the National Electrical Safety Code shall apply with the height of rail car assumed to be 23 feet. A cable that contains optical fibres in loose tubes, with a nominal cable diameter of less than 10 mm. Generally, these. Court, 10-18 Adelaide Street, Belfast, BT2 8GB. Enquiries about authorisation for non-prescrib ng and installing at-grade pedestrian crossings.
