

# Swiss AI Server

## Overview

High-performance GPU servers for AI workloads in Swiss data centres. Personal support from real engineers. Leverage our expertise to successfully develop your GenAI applications and use our AI platform to implement your machine learning. OpenTela (Aka: OpenFabric) is a distributed computing platform designed to orchestrate computing resources across a decentralized network. It leverages peer-to-peer networking, CRDT-based state management to create a resilient and scalable network of computing resources. It is used to power the. Attend our annual AI summit in Zurich this fall featuring over 50 sessions with over 65 exhibitors and partners, over 150 speakers, and attended by over 2000 participants. Open weights, open data, open science. We operate dedicated Nvidia. Nvidia H100 or L4 GPUs in Swiss Data Centres to run your own AI workloads. Run your own AI stack on H100 GPUs for best performance.
