

Switch Fiber Optic Cable Management Rack

Overview

It is an all-in-one cable management solution consisting of 24 retractable Cat. 6a or Fiber Optic Cables that replaces conventional cable managers. Our innovative system enables 10x faster installation & maintenance and thanks to our Patchcatch it also allows up to 50% more space. While both serve the same goal of keeping cables organized, they approach the task from different directions, and together they. In today's high-speed data environments, fiber optic cables have become the backbone of modern networking, delivering lightning-fast connectivity for everything from cloud computing to 4K video streaming. Choose from racks, panels, modules, splice trays, ethernet fiber switches and other structured cabling components. Belden offers a complete line of open frame racks and cabinets that support all applications, from single-rack or cabinet applications (such as retail and telecom closets) to high-density, multi-rack/multi-cabinet patching and switching fields (in computer rooms, data centers and central offices).
