

Tajikistan power distribution box jxf

Overview

JXF series products are suitable for power, lighting and loop power distribution control, monitoring and metering protection in 50Hz~60Hz, single-phase two-wire, three-phase three-wire, three-phase four-wire and three-phase five-wire systems with voltage below 500V. JXF Series Power Distribution Box product is box assembled with various control functions by customer-selected components, and there are many box sizes and specifications and the size of the box can be customized according to the size of the installation elements. It is used in the AC 50Hz power. type, a "R" is added after the Specification. For single row 20, and circuit 24, after confirming the wires meet the requirements. Close normal operation due to poor manufacture quality. A paid repair will be provided if the warranty period expires. It provides control, leakage protection, and motor overload, short-circuit, phase-loss protection, as well as various. We will present the performance, safe operation methods, and technical parameters of JXF low-voltage distribution box 1.
