

# Technical Parameters of Armored Fiber Optic Patch Cords

## Overview

2mm Buffer Diameter 600 $\mu$  Primary Coating 245 $\mu$  Strength Member steel tube protection, aramid yarn and reinforcing steel-wire braiding flame-retardant jacket Jacket Material LS0H / LSZH / PVC Bending Radius - Dyanmic (CM) 20 x D (D: Simplex. Cable O. They are with various kinds of fiber optic connector types. Armored fiber optic cable with build-in metal armor can provide stronger protection of the optical fibers than standards fiber optic cables. The rugged armored cables allow optical fiber to be installed in the most hazardous areas, including environments with slight dust, oil, gas, moisture, or. Iveonet™ provides an extensive line of high performance armored fiber assemblies. The reliability and efficiency of an optical network heavily depend on the quality of these patch. armored fiber optic patch cord should be selected by connector type, single mode or multimode, cable length, armor type, jacket, insertion loss, labeling, packaging, and quantity. B2B buyers should confirm application, quantity, quality standard, packaging, destination country, and delivery target.
