

The demand for fiber optic cables driven by FTTH

Overview

The market growth is primarily driven by the exponential rise in global internet traffic, 5G deployment, cloud computing expansion, and hyperscale data center investments, which are increasing demand for high-speed, low-latency communication infrastructure. The global fiber optic cable market size was valued at approximately USD 13.20 billion by 2033, at a CAGR of 2% during the forecast period. I need the full data tables, segment breakdown, and competitive landscape for detailed regional analysis and revenue estimates. The market size, estimated at \$50 billion in 2025, is projected to expand. The fiber broadband industry continues to evolve rapidly, driven by surging demand, transformative government funding programs, and ongoing technological advancements. At the same time, the supply chain supporting fiber deployment faces new challenges that require a coordinated response from all. The model underpinning the Fibre to the Home (FTTH) expansion in many European markets is coming under strain.
