

The function of cable trays in basements

Overview

Residential Buildings: In homes, cable trays are often used in basements, attics, and utility areas to manage wiring for lighting, HVAC systems, and other essential utilities. **Commercial Buildings:** Office buildings, shopping centers, and public facilities utilize cable trays for data cabling. B manufactures its cable tray in a range of materials with a variety of finishes. Aluminum's exceptional corrosion resistance, particularly. Understanding the types of cable containment systems, including trays, trunks, and conduits, helps engineers and contractors select the best solution for performance, safety, and compliance. Each system offers unique benefits depending on the environment, cable load, and future accessibility. This design provides adequate ventilation and is ideal for heavy cables and high-density installations. **Perforated Tray:** Features a flat bottom with holes or.
