

Triple-network integrated fiber optic distribution box with 6 sockets

Overview

This terminal box terminates up to 12-24 fiber optic cables, offers spaces for splitters and up to 12-24 fusions, allocates 6 x SC Duplex adapters or 6 x LC Quad adapters and working under both indoor and outdoor environments. It is a perfect cost-effective. Splice boxes and splice distributors are essential for a reliable fiber optic cabling system and serve as a connecting point between the fiber optic installation cable and the in-house network. High quality components ensure a secure and stable operation. A fiber optic distribution box — also known as an FDB or NAP (Network Access Point) — is a mid-span enclosure that distributes fibers from a feeder cable to individual drop cables serving subscribers or building floors. This UV resistance housing is designed for wall mount applications to provide protection for fiber optic. FBR-11606 Fiber-Optic Distribution Box, 6-Core is a high quality product by Bud Industries used for electronic enclosure applications.
