

What are Israeli fireproof cable trays

Overview

These specialized trays are designed using non-combustible materials, often rated according to international standards such as UL 94 and IEC 60332. Middle East projects expose cable tray systems to extreme ambient temperatures, intense solar radiation, dust, and—often—coastal corrosion. When fire resistance is required, the “best” solution is rarely universal. This capability. There are several material choices available for cable trays in today's market, the most popular choices are steel (HDG/SS), aluminum, PVC and FRP/GRP. Their use is related not only to the requirements of building codes, but also to the need to maintain the integrity and operability of critical systems at. FireResistant Solutions provides cable tray covering and fire-protection systems designed to safeguard electrical and data infrastructure in commercial and multifamily buildings. Our durable, high-quality trays come in various sizes and styles to fit any project, big or small.
