

What are the uses of 12-color bundled pigtails

Overview

Uses: CATV, LAN/access network, telecommunication network/Gigabit data network test, medical equipment, other industrial and military applications; Features: Comply with ANSI, Bellcore, TIA/EIA, IEC and other international standards and domestic telecommunications industry. Uses: CATV, LAN/access network, telecommunication network/Gigabit data network test, medical equipment, other industrial and military applications; Features: Comply with ANSI, Bellcore, TIA/EIA, IEC and other international standards and domestic telecommunications industry. A fiber optic pigtail is a short length of optical fiber—typically 0.5m to 2m—that has a factory-terminated connector on one end and bare fiber on the other end. The bare fiber end. 12 color bundle pigtail consists of 12 pigtails, and the colors are: blue, orange, green, brown, gray, white, red, black, yellow, purple, pink, light blue. Product features Bundle pigtails consist of Corning's tight-fitting optical fiber that meets the full chromatographic specifications, is. Fiber Optic Pigtails are mainly categorized into single-core, dual-core, 4-core bundled pigtails, 12-core bundled Fiber Optic Pigtails, 12-color bundled pigtails, SC bundled Fiber Optic Pigtails, FC bundled pigtails, LC bundled pigtails, and ST bundled pigtails. This setup ensures. The 12-color pigtail generally refers to a certain length of 12-core fiber optic cable cut out according to the use of demand, and then the 12 different color cladding cores at one end of the cable to extract pre-terminated ST, LC, SC, FC and other fiber optic connectors, leaving the other end.
