## Overview

A junction box, also known as a wire box or terminal box, is a closed container used to fix, protect and connect wires and cables. It serves as a control interface or distribution point in industrial systems. Conversely, a junction box is a protective enclosure used primarily. They are used as a link between the main cable to the control room and the branch cables into the field. We offer bespoke, custom-made terminal boxes and terminal box combinations, as well as standard products with short delivery times. Terminal boxes come in a variety of sizes and shapes to suit different applications, and can be made. What is a Terminal Box (TB)?

A Crucial HVAC Endpoint At its most fundamental, a Terminal Box (TB) is a sophisticated endpoint device integral to a building's HVAC (Heating, Ventilation, and Air Conditioning) system. While much of the HVAC system focuses on conditioning air centrally, the TB brings. What are Terminal and Control Boxes?
