

What level of leakage protection does the distribution box have

Overview

Three level distribution refers to the general distribution box, distribution box, switch box., the second level contains a large three-phase circuit breaker, and the third level contains a single-phase circuit breaker. Distribution boxes protect our electrical systems like bodyguards shield VIPs. When they fail, everything goes dark. Via these enclosures, you're able to protect the most sensitive electrical components from eco-hazards, such as humidity, water jets, and dust, which your. Leakage protector must be installed in the main distribution box (distribution box) and switch box, and the selection of rated leakage action parameters shall comply with the following regulations: (1) The rated leakage action current of the leakage protector in the main distribution box shall be. EKDB10 plastic waterproof distribution boxes are made of the highest quality plastic materials and are available in ABS and PC. They have ample wiring space, IP65 protection level, and are available in 7 different specifications.
