

Zimbabwe 200G Optical Transceiver Module

Overview

This module is engineered for high-speed, medium-distance interconnections between networking equipment in data center environments. Wavelengths: Integrated CWDM MUX/DEMUX with center wavelengths at 1271 nm, 1291 nm, 1311 nm, and 1331 nm. Engineered for reliability and scalability, these transceivers ensure efficient and seamless communication across various network. Broadex Technologies' high performance and cost effective 200G Optical Transceiver Modules are built utilizing our innovative COB technology in a QSFP56 form factor. Designed for use in next-generation datacenters, these reliable and robust modules support high speed bit rates up to 200Gb/s over. GIGALIGHT provides a series of BER testing tools (checker) for 10G SFP+, 25G/32GFC SFP28, 40G QSFP+, 100G QSFP28, 200G QSFP56, and 200G/400G QSFP-DD optics. Compared with earlier generations such as 40G and 100G modules, it delivers significantly higher throughput while maintaining energy efficiency and compact form factors. As a result, it has been widely.
